 - 500 g–2 kg/coil, 1 coil/plastic bag, 10 bags/carton.
 - 50 g–200 g/spool, 5 spools/plastic bag, 10 bags/carton.
 - Cut wire: 2 kg/carton, 5 kg/carton, 1 ton/pallet.
 - Wooden stick: 20 pcs/plastic bag, 10 bags/carton.
 - Different orders can be customized.

Category

The following focuses on the enameled craft wire, PVC coated craft wire, paper covered craft wire, anodized aluminum craft wire, silver-plated copper craft wire.

Enameled craft wire

Enameled craft wire, metal wire with an enameled coating which present bright colors, good gloss, smooth surface, repairable, easy maintenance. It is good for craft items, floral arrangement, art models, jewelry design.

PVC coated craft wire

PVC coated craft wire is usually raw material is black iron wire, galvanized wire, copper wire, stainless steel wire, with high quality PVC or PE through high temperature dissolving and cooling firmly combined together. With various colors and low cost, anti-aging, it's the ideal material for decorative crafts, floral arrangement, wire sculptures.

Paper covered craft wire

Paper covered craft wire is the best choice for floral arrangement, craft items, weaving decorative. Its raw material usually is iron wire, aluminum wire, galvanized wire, then tightly wrapped with paper coating. With low cost and light weight, bright colors, it's very suitable used in the flower arrangement.

Anodized craft wire

Anodized craft wire usually refers to anodized aluminum craft wire. This type craft wire featured by good gloss, flexible, anti-corrosion, can be used for craft items and jewelry designs. When using anodized aluminum craft wire to wrapper a bigger stones , it's firm but light enough to wear.

Gold/silver plated craft wire

Gold/silver plated craft wire often use copper wire and aluminum wire as raw material, which with a layer of fine gold or silver coated. This will play a decorative role and it is more anti-corrosion. Jewelry designers love this craft line because of its good gloss and low cost.
