## (1i) WALCOOM

Walcoom Corporation

## "The best solution for farm and pasture fencing"

Walcoom Corporation has been offering the strong and durable field fencing products for 20 years. We are specialized in field fence producing and exporting. Advanced production equipment, skilled workers, professional sale representatives and considerate after sale service contribute our high quality products and long term cooperation with our customers.

Field fence, made of high quality carbon steel or zinc aluminum alloy, is also called cattle fence or grassland fence. Field fences can be divided into square deal field fence, fixed knot field fence and hinge joint fencing. With galvanized or PVC coated surface, they have good anticorrosion effect.

Compared with other fences, our field fences are featured by the high strength, easy installation and long service life. They are widely used for fencing of various animals such as cattle, horse, sheep and deer. Besides, they also can be used with barbed wire for farm fencing, garden fencing, road fencing, forest fencing and so on.

## Feature of field fence

- High strength and firm structure.
- Various styles and sizes for choice.
- Corrosion and rust resistance.
- Easy installation and less maintenance.
- Durable and long service life.

## Specification of field fence

- Material: carbon steel, zinc aluminum alloy.
- Surface treatment: galvanized, PVC coated.
- Type: square deal field fence, hinge joint fencing, fixed knot field fence.

## Application

- Cattle or horse fence.
- Grassland or farm fence.
- Hunting or game fence.
- Road or highway fence.
- Garden fence.
- Forest fence.
- Perimeter fence.
- Plantation fence

## Square deal field fence

Square deal field fence, made of high quality steel wire, is also called $S$ knot field fence because of the $S$ shaped knot. It is formed by using a separate wire to attach the line wire to the solid stay wire, and the knot is very smooth. With hot dipped galvanized surface, square deal field fence is corrosion and rust resistant. Featured by high strength, perfect rigidity and long service life, it is widely used for various animals fencing in farm and pasture. Besides, it also can be used for forestry fencing, road, railway, or highway fencing and so on.

## Advantage of square deal field fence

- High strength and rigidity.
- Not buckling or sagging.
- Anti-climb effect for security.
- Corrosion and rust resistant.
- Various sizes for applications.
- Durable and long service life.

## Specification of square deal field fence

- Material: steel wire.
- Typical surface treatment: hot dipped galvanized.

Table 1: Common Specifications of Square Deal Field Fence

| Item | SKF 22/160/15 | SKF 17/192/15 | SKF 22/200/15 | SKF 20/245/15 |
| :---: | :---: | :---: | :---: | :---: |
| Knot | S knot | S knot | S knot | S knot |
| Height | 1600 mm | 1920 mm | 2000 mm | 2450 mm |
| Light High Tensile | RL | R | RL | R |
| Number of Longitudinal Wire | 22 | 17 | 22 | 20 |
| Wire Diameter | 2.0 mm | 2.5 mm | 2.0 mm | 2.5 mm |
| Mesh Size | 15 cm | 15 mm | 15 cm | 15 cm |
| Standard Roll Length | $\begin{gathered} 50 \mathrm{~m}, 100 \mathrm{~m}, 150 \mathrm{~m}, \\ 200 \mathrm{~m} \end{gathered}$ | $\begin{gathered} 50 \mathrm{~m}, 100 \mathrm{~m}, 150 \mathrm{~m}, \\ 200 \mathrm{~m} \end{gathered}$ | $\begin{gathered} 50 \mathrm{~m}, 100 \mathrm{~m}, 150 \mathrm{~m}, \\ 200 \mathrm{~m} \end{gathered}$ | $\begin{gathered} 50 \mathrm{~m}, 100 \mathrm{~m}, 150 \mathrm{~m}, \\ 200 \mathrm{~m} \end{gathered}$ |
| Tensile Strength of Longitudinal Wire | $1300 \mathrm{~N} / \mathrm{mm}^{2}$ | $1400 \mathrm{~N} / \mathrm{mm}^{2}$ | $1300 \mathrm{~N} / \mathrm{mm}^{2}$ | $1400 \mathrm{~N} / \mathrm{mm}^{2}$ |
| Tensile Strength of Vertical Wire | $900 \mathrm{~N} / \mathrm{mm}^{2}$ | $900 \mathrm{~N} / \mathrm{mm}^{2}$ | $900 \mathrm{~N} / \mathrm{mm}^{2}$ | $900 \mathrm{~N} / \mathrm{mm}^{2}$ |
| Suitable Animal | sheep, goat, cattle, chicken, rabbit | deer, cattle, pig, sheep, goat | sheep, goat, cattle, chicken, rabbit | deer, horse, cattle, sheep, pig |

## Hinge joint fencing

Hinge joint fencing, also called farm fencing or hinge joint fence, is made of low carbon steel wire or zinc aluminum alloy wire. And there are two vertical stay wires that wrap together to form hinged joint then twisted on the horizontal line wire. With the features of high tensile strength, corrosion and rust resistance, easy installation and long service life, hinge joint fencing is the best choice for ranchers to fence and protect their animals such as cow, horse, deer and sheep. Besides, It's also popular for garden fencing, lawn fencing, forest fencing and so on.

## Advantage of hinge joint fencing

- High strength and flexibility.
- High utility value, easy installation.
- Corrosion and rust resistant.
- Durable and long service life.

## Specification of hinge joint fencing

- Material: low carbon steel wire, zinc aluminum alloy wire.
- Typical surface treatment: galvanized.

Table 2: Wire Diameter and Tensile Strength of Hinge Joint Fencing

|  | Light Duty Fence |  | Middle Duty Fence |  | Heavy Duty Fence |  | Extra Heavy Duty <br> Fence |  |

## Fixed knot field fence

Fixed knot field fence, mainly made of low carbon steel wire, is also called game fence. It is featured by the solid knot, which combines the hinge joint knot structure. This field fence has higher strength and flexibility and it can be installed quickly with fewer fence posts. With less cost, corrosion resistance, easy installation and long service life, fixed knot field fence is mainly used as field fence to protect cattle, deer, horse and goat.
 It's also used as farm fence, grassland fence, hunting fence, perimeter fence, plantation fence, etc.

## Advantage of fixed knot fence

- High strength and flexibility.
- Firm structure and less cost.
- Corrosion and rust resistance.
- Easy installation, less maintenance.
- Durable and long service life.

## Specification of fixed knot fence

- Material: high tensile low carbon steel wire.
- Surface treatment: galvanized, PVC coated.
- Zinc coating: $230-350 \mathrm{~g} / \mathrm{m}^{2}$.
- Horizontal wire: 2.50 mm , tensile strength: $1200-1400 \mathrm{~N} / \mathrm{mm}^{2}$;
- Vertical wire: 2.50 mm , tensile strength: 820-970 $\mathrm{N} / \mathrm{mm}^{2}$;
- Node wire: 2.24 mm , tensile strength: 400-550 N/mm²;

## FIEDD FENGE

Table 4: Common Type Fixed Knot Field Fence Specification

| Type | Fence Height (cm) | Number of Horizontal Wire | Distance of Vertical Wire (cm) | Roll Length (m) |
| :---: | :---: | :---: | :---: | :---: |
| FKF 100/8/15 | 100 | 8 | 15 | 50, 100, 150 |

## Three methods of wild boars fence installation

- First method: metal fence partly buried.

To build a fence and prevent migration of wild boars, the fencing may be partially buried in the ground. For example, a 210 cm height fencing buried 35 cm deep, and left 175 cm height above ground. This method is effective against wild boars but we lose a little height. So, If you need a fence 210 cm height above ground, you should order 245 cm height fencing, and bury 35 cm into ground. If you need a fence 200 cm height above ground, you should order at least 230 cm height fencing, and bury 30 cm into ground.

- Second method: mesh fence add skirt buried.

Another option fence to prevent the passage of wild boars is burying a mesh skirt fixed by stitching wire or fence staples to the based fence. This method can maintain the original height of the base fence, against the boar with 30 cm skirt buried (wild boars can get to dig to a certain depth), thus, avoiding accidents. In major road, highway and rail infrastructure, we will often use these fences to avoid boars and other animals access into.

- Third method: strengthen the base field fence with another mesh fence.

To prevent the passage of feral if we already have a fence, the best option may be to strengthen the fenced at its base. A rigid mesh panel (may be chicken wire mesh or welded wire panels) attached to existing fencing by fence staples or binding wires and bury it in the ground, it would be a good choice.

## Information supplied by the purchaser

The following information shall be supplied by the purchaser at the time of inquiry or order:
